the facial action coding system *facs* is a comprehensive anatomically based system for describing all observable facial movement it has been used for research on the psychology of emotion to understand mental health to detect deception and to drive the computer generated images in special effects this book includes original studies using *facs* the study of spontaneous behavior in both humans and animals that cuts across several fields including psychology medicine law and veterinary medicine

while we have known for centuries that facial expressions can reveal what people are thinking and feeling it is only recently that the face has been studied scientifically for what it can tell us about internal states social behavior and psychopathology today s widely available sophisticated measuring systems have allowed us to conduct a wealth of new research on facial behavior that has contributed enormously to our understanding of the relationship between

facial expression and human psychology the chapters in this volume present the state of the art in this research they address key topics and questions such as the dynamic and morphological differences between voluntary and involuntary expressions the relationship between what people show on their faces and what they say they feel whether it is possible to use facial behavior to draw distinctions among psychiatric populations and how far research on automating facial measurement has progressed the book also includes follow up commentary on all of the original research presented and a concluding integration and critique of all the contributions made by paul ekman as an essential reference for all those working in the area of facial analysis and expression this volume will be indispensable for a wide range of professionals and students in the fields of psychology psychiatry and behavioral medicine

manipulative communication from early twentieth century propaganda to today s online con artistry examined through the lens of social engineering the united states is awash in manipulated information about everything from election results to the effectiveness of medical treatments corporate social media is an especially good channel for manipulative communication with facebook a particularly willing vehicle for it in social engineering robert gehl and sean lawson show that online misinformation has its roots in earlier techniques mass social engineering of the early twentieth century and interpersonal hacker social engineering of the 1970s converging today into what they call masspersonal social engineering as gehl and lawson trace contemporary manipulative communication back to earlier forms of social engineering possibilities for amelioration become clearer the authors show how specific manipulative communication practices are a mixture of information gathering deception and truth indifferent statements all with the instrumental goal of getting people to take actions the social engineer wants them to yet the term fake news they claim reduces everything to a true false binary that fails to encompass the complexity of manipulative communication or to map onto many of its practices they pay special attention to concepts and terms used by hacker social engineers including the hacker concept of bullshitting which the authors describe as a truth indifferent mix of deception accuracy and sociability they conclude with recommendations for how society can undermine masspersonal social engineering and move toward healthier democratic deliberation

this book constitutes the refereed proceedings of the 4th international conference on social robotics icsr 2012 held in chengdu china in october 2012 the 66 revised full papers were carefully reviewed and selected from numerous submissions the papers are organized in topical sections on affective and cognitive sciences for socially interactive robots situated interaction and embodiment robots to assist the elderly and persons with disabilities social acceptance of robots and their impact to the society artificial empathy hri through non verbal communication and control social telepresence robots embodiments and networks interaction and collaboration among robots humans and environment human augmentation rehabilitation and medical robots

a radio 4 book of the week full of delightful nuggets guardian online entertaining informative and philosophical an essential read all about history extraordinary range all the world and more is here evening standard 165 million years ago saw the birth of rhythm 66 million years ago came the first melody 40 thousand years ago homo sapiens created the first musical instrument today music fills our lives how we have created performed and listened to music throughout history has defined what our species is and how we understand who we are yet it is an overlooked part of our origin story the musical human takes us on an exhilarating journey across the ages from bach to bts and back to explore the vibrant relationship between music and the human species with insights from a wealth of disciplines world leading musicologist michael spitzer renders a global history of music on the widest possible canvas from global history to our everyday lives from insects to apes humans to artificial intelligence michael spitzer has pulled off the impossible a guns germs and steel for music daniel levitin a thrilling exploration of what music has meant and means to humankind ian bostridge

a proposal that extends the enactive approach developed in cognitive science and philosophy of mind to issues in affective science in the feeling body giovanna colombetti takes ideas from the enactive approach developed over the last twenty years in cognitive science and philosophy of mind and applies them for the first time to affective science the study of emotions moods and feelings she argues that enactivism entails a view of cognition as not just embodied but also intrinsically affective and she elaborates on the implications of this claim for the study of emotion in psychology and neuroscience in the course of her discussion colombetti focuses on long debated issues in affective science including the notion of basic emotions the nature of appraisal and its relationship to bodily arousal the place of bodily feelings in emotion experience the neurophysiological study of emotion experience and the bodily nature of our encounters with others drawing on enactivist tools such as dynamical systems theory the notion of the lived body neurophenomenology and phenomenological accounts of empathy colombetti advances a novel approach to these traditional issues that does justice to their complexity doing so she also expands the enactive approach into a further domain of inquiry one that has more generally been neglected by the embodied embedded approach in the philosophy of cognitive science

renowned psychologist paul ekman explains the roots of our emotional responses from anger and fear to sadness and happiness and shows how these emotions cascade across our faces revealing information to those who can decipher the clues ekman s research and practical training were prominently featured in malcolm gladwell s bestseller blink and the insights in emotions revealed provide us with the skills to recognize feelings in our spouses children business colleagues even strangers on the street ekman translates his research into a practical mind opening guide to reading the emotions of those around us he explains what triggers emotions and whether we can control them shows how our body signals to others whether we are slightly sad or truly anguished peeved or enraged and teaches us how to distinguish

between a polite smile and the genuine thing packed with unique exercises and photographs and a new chapter on emotions and lying that discusses how to identify possible deceit hot spots in everyday life emotions revealed is an indispensable resource for navigating our emotional world book jacket
